

## St Patrick's Day Wreath

### **Supplies needed:**

- One piece of card board (large enough to fit a dinner plate on it). The side of a cardboard box works well.
- Three shades of green paper or light card paper
- Pencil
- Scissors
- Printed template page
- Glue stick
- Shamrock sequin (optional)

### **Method:**

- First draw a circle around a dinner plate and then an inner circle using a smaller round plate or bowl. The ring width should be 1.5 to 2 inches (4 to 5 cm).
- Cut this out. This can be a little tricky if the card is very thick.

- Print the Template pattern at the end of this page and cut out the shapes.
- Place the templates on your green papers, draw around them and cut out the shapes.
- You need four shamrocks of the biggest size in a dark green color.
- Four shamrocks of the same size in a mid-green color.
- Three or four of the medium sized shamrocks in the lightest color.

- Place the four darkest shamrocks evenly spaced on the ring, use the glue stick and stick into place.
- Place the mid-green color shamrocks in the spaces between and glue into place.

- Add and glue on the lightest color smaller shamrocks where you think they look best.
- You can also add some very small shamrocks here or use shamrock sequins as I have done.
- If you don't have sequins, you can cut a few of the smallest size shamrock template or green buttons and add them.
