3D Shamrock

Supplies needed:

- Two or three shades of green paper
- Pencil
- Scissors
- Tacky glue
- Printed template page

Method:

- To start, print the template provided at the end of this project and cut out the shapes
- Draw around the template on the darkest green paper and cut out the large shamrock.
- Cut out three of each size of the smaller heart shapes.

- Fold over each heart in the middle as you see in the picture.

- Put a thin string of glue on the back of the fold of the larger hearts.
- Hold in place in the middle of each shamrock petal for a few seconds until it stays in place. You want it to stick up a bit on the sides, not lie flat on the shamrock.

- Do the same for the lightest shade of green small heart shapes.

Happy St Patrick's Day!
